

CS 599 Biometrics

Homework Assignment 01

Jan 21, 2026

Due in BlackBoard: Wednesday, January 28, 2026

Reading Assignment:

Introduction to Biometrics, Anil Jain

Problem 1) Please visit Microsoft Azure (Cloud) site and examine in detail Azure Services: <https://azure.microsoft.com/en-us/products/ai-services/>

Note that there are several groups of services and within each group several actual services. Review those services briefly and tell us which of those services could be used for at least one of Biometric modalities discussed in class. Provide a brief description of every Azure service and the reason why you think it could be used for a particular biometric modality. You are not expected to provide practical examples of such usage or code samples. We expect just clear description of any one service and its potential use as a biometric tool or in support of a biometric tool. (30%)

Problem 2) Visit Amazon AWS Cloud and examine similar services offered by AWS. Tell us which AWS services could be used for biometric modalities. Provide one brief paragraph providing a general description of every AWS service potentially useful for biometric and one paragraph describing a potential use of that service in biometrics. You are not expected to provide practical examples of such usage or code samples. We expect just clear description of any one service and its potential use as a biometric tool or in support of a biometric tool. (30%)

Problem 3) Please visit OpenAI and identify any of the API-s or services that that company offers as potentially useful in biometrics field. You are not expected to provide practical examples of such usage or code samples. We expect just clear description of any service or API and a clear description of the potential use of a service as a biometric tool or in support of a biometric tool. (40%)

Note: Future assignments will be more elaborate ☺

Please submit homework solutions on or before the due date. Your main submission should be a MS Word document containing your deliberations and architectural drawings. If your solution contains more than one file, please Zip all files into a single archive named: cs599_YourLastNameYourFirstName_01.zip. It is very important that your file has your name on it. Submit solution to class BlackBoard site: https://learn.bu.edu/ultra/courses/_267306_1/outline
